While it ess otherwise undesira	imens, including, but not limite ter thawing. At this time, there e chances of abnormalities i t is also possible that the res ble traits or hereditary tender uent or severe than in children	e is no proven n intrauterine ulting child or acies, or other
	y samples should be: y partner [] donate	ed for research purpose	es [] destroyed.	
I also understand that there are potential risks involved with storing specimens at the Andrology Laboratory. Although sperm specimens are kept in liquid nitrogen in containers equipped with a temperature alarm system, accidental thaw damage or loss of sample may occur at any time due to technical malfunction, the complete or partial destruction of the laboratory, or a variety of other reasons. I understand that I will only be entitled to damages equal to the storage fee in the event of such occurrences.				
I understand that by signing this section I am giving permission to the CRM Andrology Laboratory to release my frozen donor specimen to be used in artificial insemination, in vitro fertilization or intracytoplasmic sperm injection.
